The library has computers connected to the Internet and the tables contain library instructions.

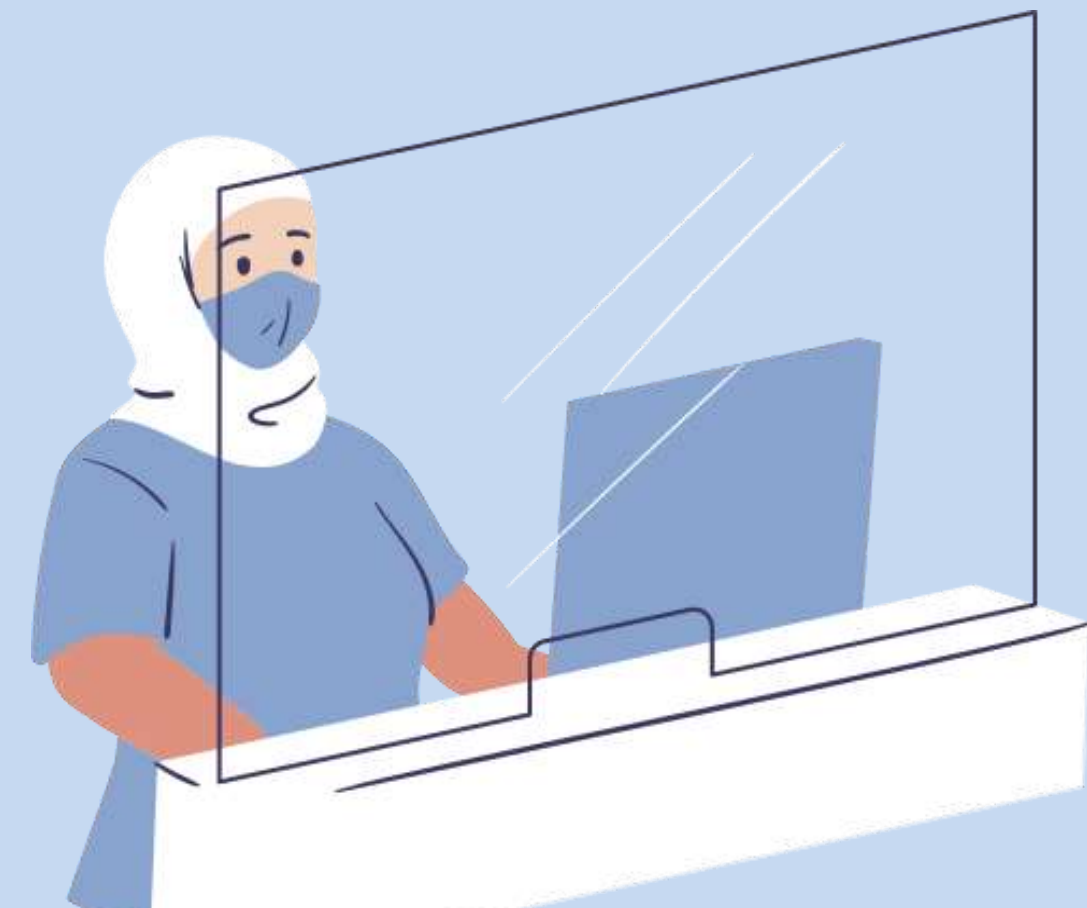

The library contains doctoral and master's theses in sections. If you want to view them, you should visit the library.

If you want to see any type of library containers, you can visit the library, but on condition that you are a student from the Faculty of Medicine, a researcher, or preparing a master's or doctorate. The teaching staff can also visit and see, but books cannot be borrowed from outside. This is the library's policy. The library also provides photocopying and printing services.

Thank you for your
attention
